## 1 — Introduction

### 1.1 What Is the National Climate Transparency Platform?

The **National Climate Transparency Platform (NCTP)** is a digital solution that helps countries comply with the **Enhanced Transparency Framework (ETF)** of the Paris Agreement. It enables governments to centrally manage,

track, and report on **Nationally Determined Contributions (NDC)** and all related climate actions.

1.2 Who Is This Platform For?

| User Type                  | Role on Platform                                          |
|----------------------------|-----------------------------------------------------------|
| Government Ministries      | Track mitigation and adaptation activities across sectors |
| Climate Change Departments | Manage national climate action data centrally             |
| Implementing Entities      | Execute and report on climate projects                    |
| Development Partners       | Monitor international support and cooperation             |
| Observers                  | View climate data with read-only access                   |

1.3 Key Benefits

| Benefit              | Description                                         |
|----------------------|-----------------------------------------------------|
| Centralized Data     | All climate action data in one place                |
| Automated Reporting  | Auto-generates ETF/UNFCCC reports (CTF)             |
| GHG Tracking         | Manage emissions inventories and future projections |
| Financial Monitoring | Track climate finance needed vs received            |
| Role-Based Access    | Secure, permission-based data management            |
| Multi-Language       | Available in English and French                     |

1.4 Data Hierarchy

The platform organizes climate data in a clear top-down hierarchy:

Action (highest level – aligned with NDC/NAP)

- └ Programme (sectoral intervention implementing the action)
  - └ Project (specific initiative within a programme)
    - └ Activity (operational task producing measurable results)

Each level can be linked to **Support** entries (financial or non-financial).

---

2 — Getting Started

2.1 Logging In

| Step | What to Do                                                    |
|------|---------------------------------------------------------------|
| 1    | Open the platform URL in your web browser                     |
| 2    | Enter your <b>Email</b> and <b>Password</b>                   |
| 3    | (Optional) Select your preferred language — English or French |

|   |                    |
|---|--------------------|
| 4 | Click <b>Login</b> |
|---|--------------------|

**First-time users:** You may be prompted to change your temporary password on first login. Choose a strong password and store it securely.

## 2.2 Forgot Password

| Step | What to Do                                          |
|------|-----------------------------------------------------|
| 1    | On the Login page, click <b>Forgot Password</b>     |
| 2    | Enter the email address linked to your account      |
| 3    | Check your inbox for a password reset link          |
| 4    | Click the link, enter and confirm your new password |
| 5    | Submit — you can now log in with the new password   |

## 2.3 Platform Layout

The platform has three main navigation areas:

```
+-----+
|  HEADER BAR      | [Language] [User Profile / Logout] |
+-----+
|  |  |
|  SIDEBAR |  MAIN CONTENT AREA  |
|  (menu)  |  |
|  |  |  Tables, forms, charts, and reports  |
|  |  |  are displayed here  |
|  |  |  |
+-----+
```

**Sidebar (left):**

- Main navigation menu with all modules
- Click the **arrow icon** to collapse/expand
- Current page is highlighted
- Country logo displayed at top

**Header Bar (top):**

- **Language Selector** — switch between English and French anytime
- **User Profile Dropdown** — view profile, change password, or log out

## 2.4 Sidebar Menu Overview

- Dashboard
- Actions
- Programmes
- Projects
- Activities
- Support

```
GHG Inventory
├─ Emissions
├─ Projections
├─ Combined Expected
├─ Combined Achieved
└─ Configurations
Reporting
FAQ
Climate Financing
MRV Emissions
└─ Monitoring Plans
Gender Reporting
Verifications
Reviews
Climate Budget Transparency
├─ Basic Information
├─ Funding Sources
├─ Financial Instruments
└─ Macro Indicators
User Management          ← Admin / Root only
```

## 3 — Dashboard

The **Dashboard** is your landing page after login — an executive overview of the entire system.

### 3.1 Interactive Charts

The dashboard displays **six charts** that update in real time:

| # | Chart                           | Type | What It Shows                            |
|---|---------------------------------|------|------------------------------------------|
| 1 | Climate Actions by Sector       | Pie  | Distribution of actions across sectors   |
| 2 | Projects by Sector              | Pie  | How projects are spread across sectors   |
| 3 | Support Needed vs Received      | Pie  | Count of support activities by direction |
| 4 | Finance Needed vs Received      | Pie  | Financial comparison in USD              |
| 5 | GHG Mitigation by Year & Sector | Bar  | Mitigation breakdown (select year)       |
| 6 | Recent GHG Mitigation           | Bar  | Previous year's mitigation results       |

Each chart shows a "**last updated**" timestamp.

### 3.2 Recent Actions Table

Below the charts, a summary table lists the most recent climate actions:

| Column    | Description       |
|-----------|-------------------|
| Action ID | Unique identifier |

|                           |                                         |
|---------------------------|-----------------------------------------|
| Title                     | Name of the action                      |
| Status                    | Planned / Adopted / Implemented         |
| Type                      | Mitigation / Adaptation / Cross-cutting |
| Sectors                   | Affected sectors                        |
| Implementing Entities     | Organizations involved                  |
| Finance Needed / Received | Financial summary in USD                |

**Tip:** Click any row to go directly to that action's detail page.

## 4 — Climate Actions

**Path:** Sidebar > **Actions**

Actions are the **top-level climate interventions** aligned with the country's NDC or NAP. They are the starting point of the data hierarchy.

### 4.1 Browsing Actions

The list page shows all actions in a searchable, filterable table.

**Filters available:**

| Filter     | Options                       |
|------------|-------------------------------|
| Search     | By ID or Title                |
| Status     | Planned, Adopted, Implemented |
| Sector     | Any of the 14 sectors         |
| Validation | Validated or Not Validated    |

### 4.2 Creating a New Action

Click the + **Add Action** button, then fill in the form sections:

#### Section 1 — General Information

| Field           | Required | Description                                                |
|-----------------|----------|------------------------------------------------------------|
| Title           | Yes      | Name of the climate action                                 |
| Description     | No       | Detailed explanation                                       |
| Action Type     | Yes      | Mitigation, Adaptation, Cross-cutting, Transparency, Other |
| Status          | Yes      | Planned, Adopted, Implemented                              |
| Instrument Type | No       | Policy, Regulatory, Economic, Other                        |

|                       |     |                                        |
|-----------------------|-----|----------------------------------------|
| National Anchor       | No  | NDC, NAP, NDP, Other                   |
| Sectors               | Yes | Multi-select from 14 available sectors |
| Start Year / End Year | No  | Duration (2013–2049)                   |

## Section 2 — Implementing Entities

| Field                      | Description                                    |
|----------------------------|------------------------------------------------|
| National Implementors      | Select government ministries or departments    |
| International Implementors | Select partners (UNDP, UNEP, World Bank, etc.) |

## Section 3 — GHG Impact

| Field                  | Description                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------------------|
| GHGs Affected          | CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O, HFCs, PFCs, SF <sub>6</sub> , NF <sub>3</sub> |
| Expected GHG Reduction | Estimated reduction in tCO <sub>2</sub> e                                                           |
| Achieved GHG Reduction | Actual reduction (updated over time)                                                                |

## Section 4 — Finance

| Field            | Description                    |
|------------------|--------------------------------|
| Finance Needed   | Total financing required (USD) |
| Finance Received | Total financing obtained (USD) |

## Section 5 — Documents

Upload supporting documents (PDF, DOCX, XLSX, PNG, JPG). Add a title for each.

## Section 6 — KPIs (Key Performance Indicators)

Click + **Add KPI** to define custom indicators with Name, Unit, and Expected Value.

Click **Submit** to save.

### 4.3 Other Operations

| Operation           | Who Can Do It                        | How                                        |
|---------------------|--------------------------------------|--------------------------------------------|
| <b>Edit</b>         | Root, Admin, Gov. User               | Click the edit icon on any action row      |
| <b>View Details</b> | All users                            | Click the view icon or action title        |
| <b>Validate</b>     | Root, Admin, or permitted Gov. Users | Open action detail > click <b>Validate</b> |
| <b>Delete</b>       | Root, Admin only                     | Click delete icon > confirm in dialog      |

**In View mode** you will also see: *linked Programmes, linked Activities, linked Support, and a full **Timeline** (audit trail of all changes).*

---

## 5 — Programmes

**Path:** *Sidebar* > **Programmes**

Programmes are **sectoral-level interventions** that implement Climate Actions. Position in hierarchy: Action > **Programme** > Project > Activity.

### 5.1 Creating a Programme

Click + **Add Programme** and fill in:

| Field                     | Description                         |
|---------------------------|-------------------------------------|
| Title & Description       | Name and details of the programme   |
| Status                    | Planned, Ongoing, Completed         |
| Sectors                   | One or more sectors                 |
| Parent Action             | Link to an existing Action          |
| Implementing Entities     | National and international partners |
| Start Year / End Year     | Programme duration                  |
| Finance Needed / Received | Financial tracking                  |
| GHG Impact                | Expected and achieved reductions    |
| Documents & KPIs          | Supporting files and indicators     |

### 5.2 Managing Programmes

| Operation                                               | Who Can Do It                     |
|---------------------------------------------------------|-----------------------------------|
| <b>Edit</b>                                             | Root, Admin, Gov. User            |
| <b>View</b> (with linked projects, activities, support) | All users                         |
| <b>Validate</b>                                         | Root, Admin, permitted Gov. Users |
| <b>Delete</b>                                           | Root, Admin only                  |

## 6 — Projects

**Path:** *Sidebar* > **Projects**

Projects are **specific initiatives** within a programme. Position: Action > Programme > **Project** > Activity.

## 6.1 Creating a Project

Click + **Add Project** and fill in:

| Field                                | Description                       |
|--------------------------------------|-----------------------------------|
| Project Name & Description           | Name, details, and objectives     |
| Status                               | Planned, Ongoing, Completed       |
| Parent Programme                     | Link to existing programme        |
| Sectors & Sub-sectors                | Thematic classification           |
| Start / End Dates                    | Project timeline                  |
| Budget & Funding Sources             | Total cost and funding breakdown  |
| Implementing Partners                | Lead and supporting organizations |
| Expected Outcomes                    | Quantified targets                |
| GHG Impact, Finance, Documents, KPIs | Standard data sections            |

## 6.2 Managing Projects

Same operations as Programmes — Edit, View, Validate, Delete, and Timeline.

---

# 7 — Activities

**Path:** Sidebar > **Activities**

Activities are the **lowest-level operational tasks** producing measurable results. Position: Action > Programme > Project > **Activity**.

## 7.1 Creating an Activity

Click + **Add Activity** and fill in:

### Activity Information:

| Field               | Options                                                   |
|---------------------|-----------------------------------------------------------|
| Title & Description | Free text                                                 |
| Status              | Planned, Ongoing, Completed                               |
| Activity Type       | Mitigation, Adaptation, Cross-cutting, Enabling           |
| Measure Type        | With Measures, With Additional Measures, Without Measures |

### Technical Details:

| Field | Options |
|-------|---------|
|-------|---------|

|                      |                                                                    |
|----------------------|--------------------------------------------------------------------|
| Implementation Means | Financing, Technology Development, Capacity Building, Transparency |
| Technology Type      | Energy Efficiency, Renewable Energy, Nature Based Solutions, etc.  |
| Sector / Sub-sector  | Thematic classification                                            |

#### Additional Sections:

- GHG Data (expected/achieved reductions, baseline emissions)
- Support Requirements (finance, technology, capacity building)
- Parent Project link
- Documents & KPIs

## 7.2 Managing Activities

Same operations as other entities — Edit, View, Validate, Delete, and Timeline.

---

# 8 — Support

**Path:** *Sidebar* > **Support**

The Support module tracks **financial and non-financial support** — both what the country needs and what it has received.

## 8.1 Creating a Support Entry

Click + **Add Support**, then:

### Step 1 — Choose Direction:

| Direction       | Meaning                      |
|-----------------|------------------------------|
| <b>Needed</b>   | Support the country requires |
| <b>Received</b> | Support already obtained     |

### Step 2 — Fill in details based on type:

#### Financial Support — International

| Field        | Options                                                                       |
|--------------|-------------------------------------------------------------------------------|
| Channel      | Multilateral, Bilateral, Regional, Other                                      |
| Source       | GCF, GEF, World Bank, bilateral donors, etc.                                  |
| Instrument   | Grant, Concessional Loan, Non-concessional Loan, Equity, Guarantee, Insurance |
| Amount (USD) | Numeric value                                                                 |
| Status       | Committed or Received                                                         |

#### Financial Support — National

| Field        | Options                                                                  |
|--------------|--------------------------------------------------------------------------|
| Instrument   | Grant, Equity, Commercial Bonds, National Budget, Fiscal/Monetary Policy |
| Amount (USD) | Numeric value                                                            |

#### Non-Financial Support

| Type                              | Description                              |
|-----------------------------------|------------------------------------------|
| Technology Development & Transfer | Technology-related assistance            |
| Capacity Building                 | Training and institutional strengthening |
| Transparency                      | Support for reporting and data systems   |

**Step 3** — Link to related Actions, Programmes, Projects, or Activities.

**Step 4** — Click **Submit**.

## 9 — GHG Inventory

**Path:** Sidebar > **GHG Inventory** (dropdown menu)

This module manages national greenhouse gas data — historical emissions, future projections, and mitigation tracking.

### 9.1 Emissions

**Path:** GHG Inventory > **Emissions**

Manage the **annual national GHG inventory** following IPCC guidelines.

#### How to use:

| Step | Action                                                                                       |
|------|----------------------------------------------------------------------------------------------|
| 1    | Select or create a <b>year</b> using the tabs at the top                                     |
| 2    | Enter emissions data by <b>IPCC category</b> : Energy, IPPU, AFOLU, Waste, Other             |
| 3    | For each sub-category, enter values by <b>gas type</b> : CO2, CH4, N2O, HFCs, PFCs, SF6, NF3 |
| 4    | The system auto-calculates <b>CO2 equivalents</b> using configured GWP values                |
| 5    | Click <b>Save</b> to store as draft                                                          |
| 6    | When complete, click <b>Finalize</b> to lock the data                                        |

**Important:** Once a year is **finalized**, it cannot be modified. This protects data integrity for official reporting. Contact a Root user if corrections are absolutely necessary.

**Export:** Click **Download Excel** to export emissions data as XLSX.

## 9.2 Projections

**Path:** GHG Inventory > **Projections**

Model **future emissions scenarios** for planning and ETF reporting.

**Three scenario tabs:**

| Scenario                 | Abbreviation | Description                             |
|--------------------------|--------------|-----------------------------------------|
| With Measures            | <b>WM</b>    | Assuming current policies continue      |
| With Additional Measures | <b>WAM</b>   | Including planned new policies          |
| Without Measures         | <b>WOM</b>   | Business-as-usual (no climate policies) |

**How to use:**

| Step     | Action                                                   |
|----------|----------------------------------------------------------|
| <b>1</b> | Select a <b>scenario</b> tab                             |
| <b>2</b> | Choose a <b>Base Year</b> from available inventory years |
| <b>3</b> | Review/enter <b>growth rates</b> per sector              |
| <b>4</b> | System calculates projections through <b>2050</b>        |
| <b>5</b> | Optionally adjust individual sector/year values manually |
| <b>6</b> | Click <b>Save</b>                                        |

**Export:** Download each scenario as an Excel file.

## 9.3 Combined Expected

**Path:** GHG Inventory > **Combined Expected**

Displays **aggregated expected GHG reductions** from all mitigation actions, programmes, projects, and activities — organized by sector and year (2013–2050).

## 9.4 Combined Achieved

**Path:** GHG Inventory > **Combined Achieved**

Displays **actual GHG reductions achieved** from implemented activities. Compare against expected reductions to monitor progress.

## 9.5 Configurations

**Path:** GHG Inventory > **Configurations**

*Some settings require Root-level access.*

**GWP Settings:**

| Gas | Default                   | Configurable? |
|-----|---------------------------|---------------|
| CO2 | 1.0                       | No (fixed)    |
| CH4 | Varies by IPCC assessment | Yes           |
| N2O | Varies by IPCC assessment | Yes           |

**Growth Rate Settings** — three tabs, one per projection scenario:

- With Measures (WM)
- With Additional Measures (WAM)
- Without Measures (WOM)

Set annual growth rates per sector for each scenario.

**Sector Mapping:** Map platform sectors to IPCC inventory categories for consistent reporting.

---

## 10 — Reporting (ETF Common Tabular Formats)

**Path:** Sidebar > **Reporting**

Generate **ETF Common Tabular Formats (CTF)** for official UNFCCC submissions. All reports are **auto-populated** from data already entered in the platform.

### 10.1 Available Reports

#### Annex II — Developing Countries

| Report | Title                                                 |
|--------|-------------------------------------------------------|
| 5      | Summary of Mitigation Actions (Policies and Measures) |
| 7      | GHG Projections                                       |
| 8      | Support Needed                                        |
| 9      | Support Received                                      |

#### Annex III — All Countries (Biennial Transparency Reports)

| Report | Title                            |
|--------|----------------------------------|
| 5      | NDC Accounting (Textual)         |
| 6      | Adaptation Actions and Support   |
| 7      | Projected Emissions and Removals |
| 8      | Support Needed                   |
| 9      | Support Received                 |
| 10     | Support Provided                 |

|    |                                     |
|----|-------------------------------------|
| 11 | Finance (CTF Tables)                |
| 12 | Technology Development and Transfer |
| 13 | Capacity Building                   |

## 10.2 How to Generate a Report

| Step | Action                                                |
|------|-------------------------------------------------------|
| 1    | Navigate to <b>Reporting</b> in the sidebar           |
| 2    | Select the <b>Annex</b> tab (Annex II or Annex III)   |
| 3    | Click on the desired <b>report number</b>             |
| 4    | The report auto-generates from existing platform data |
| 5    | Use <b>filters</b> (sector, year, status) to refine   |
| 6    | Navigate pages with <b>pagination</b> controls        |
| 7    | Click <b>Export to Excel</b> to download as XLSX      |

**Tip:** Reports always reflect the latest data. Make sure all relevant data is entered and up-to-date before generating official reports for submission.

## 11 — Climate Budget Transparency (CBT)

**Path:** Sidebar > **Climate Budget Transparency** (dropdown)

Track climate-related budgets and financing across four sub-modules:

| Sub-Module                   | Path                        | Purpose                                               |
|------------------------------|-----------------------------|-------------------------------------------------------|
| <b>Basic Information</b>     | CBT > Basic Information     | Project identification, timelines, entities, status   |
| <b>Funding Sources</b>       | CBT > Funding Sources       | Domestic/international sources, amounts, disbursement |
| <b>Financial Instruments</b> | CBT > Financial Instruments | Instrument types, terms, interest rates               |
| <b>Macro Indicators</b>      | CBT > Macro Indicators      | Economic indicators, exchange rates, methodology      |

Each sub-module supports the standard operations: **Add**, **Edit**, **View**, and **Delete** (based on your role).

## 12 — Additional Modules

### 12.1 Climate Financing

**Path:** Sidebar > **Climate Financing**

Track and manage climate-related financial flows from both domestic and international sources.

12.2 MRV Emissions & Monitoring Plans

**Path:** Sidebar > **MRV Emissions**

| Feature                            | Description                                                                 |
|------------------------------------|-----------------------------------------------------------------------------|
| MRV Emissions                      | Monitor entity-level emissions, link to verification processes              |
| Monitoring Plans <i>(sub-menu)</i> | Create monitoring frameworks, define milestones, set verification schedules |

12.3 Gender Reporting

**Path:** Sidebar > **Gender Reporting**

Track gender-responsive aspects of climate actions:

- Gender considerations in projects
- Gender-disaggregated data
- Gender impact assessments

12.4 Verifications

**Path:** Sidebar > **Verifications**

Manage third-party verification records — entities, reports, findings, certification status and dates.

12.5 Reviews

**Path:** Sidebar > **Reviews**

Track internal and external review workflows — comments, ratings, status, and quality control.

12.6 FAQ

**Path:** Sidebar > **FAQ**

Access frequently asked questions and built-in platform guidance.

---

13 — User Management

**Path:** Sidebar > **User Management**

*Visible only to Root and Admin users.*

13.1 Viewing Users

The User Management page shows all users in a searchable table:

| Column | Description      |
|--------|------------------|
| Name   | User's full name |

|              |                                              |
|--------------|----------------------------------------------|
| Email        | Login email address                          |
| Phone        | Contact number                               |
| Organization | Company or ministry                          |
| Role         | Root, Admin, Government User, or Observer    |
| Permissions  | Validate, Sub-Role, GHG Inventory indicators |
| Status       | Active or Suspended                          |

**Filters:** by Role, by search (name/email), by status.

### 13.2 Adding a New User

| Step | Action                                                                 |
|------|------------------------------------------------------------------------|
| 1    | Click <b>+ Add User</b>                                                |
| 2    | Enter: Name, Email (unique), Phone, Organization                       |
| 3    | Select Role: Admin, Government User, or Observer                       |
| 4    | <i>(For Government User)</i> Set special permissions — see table below |
| 5    | <i>(For Government User)</i> Assign accessible sectors                 |
| 6    | Click <b>Submit</b>                                                    |

#### Special Permissions for Government Users:

| Permission           | What It Grants                            |
|----------------------|-------------------------------------------|
| <b>Validate</b>      | Can approve/validate climate entities     |
| <b>Sub-Role</b>      | Can manage sub-entities                   |
| <b>GHG Inventory</b> | Can access emissions and projections data |

*The new user will receive login credentials. They may be required to set a new password on first login.*

### 13.3 Editing a User

Click the **Edit** icon next to any user to update their name, phone, organization, permissions, or sector assignments.

**Note:** Email addresses **cannot** be changed after account creation.

### 13.4 Activating / Deactivating Users

| Action            | What Happens                                                  |
|-------------------|---------------------------------------------------------------|
| <b>Deactivate</b> | Account suspended — user cannot log in, but data is preserved |
| <b>Activate</b>   | Account re-enabled — user can log in again                    |

### 13.5 Your Profile

**Path:** Click your name (top-right) > **View Profile**

All users can:

- View their profile information
  - Update personal details (name, phone)
  - Change their password
- 

## 14 — User Roles & Permissions

The platform uses **four roles** with different access levels.

### 14.1 Permissions Matrix

| Capability            | Root | Admin | Gov. User    | Observer |
|-----------------------|------|-------|--------------|----------|
| View all data         | Yes  | Yes   | Yes          | Yes      |
| Create entities       | Yes  | Yes   | Yes          | No       |
| Edit entities         | Yes  | Yes   | Yes          | No       |
| Delete entities       | Yes  | Yes   | No           | No       |
| Validate entities     | Yes  | Yes   | If permitted | No       |
| Access GHG Inventory  | Yes  | Yes   | If permitted | No       |
| Manage users          | Yes  | Yes   | No           | No       |
| System configurations | Yes  | No    | No           | No       |

### 14.2 Role Details

---

#### Root — Super Administrator

- Full control over the entire system
  - Manages all users including other Admins
  - Configures GHG settings (GWP values, growth rates)
  - Can delete any entity in the system
- 

#### Admin — Administrator

- Full create/read/update/delete access to climate entities
  - Creates and manages users (except Root users)
  - Can validate entities
  - Cannot modify system configurations reserved for Root
- 

#### Government User — Standard User

- Can create, read, and update climate entities

- Access **restricted to assigned sectors** only
  - Validation, GHG, and Sub-Role permissions granted individually
  - Cannot delete entities or manage other users
- 

#### Observer — Read-Only User

- View-only access to all climate data
  - Can update their own profile only
  - Cannot create, edit, delete, or validate anything
  - Ideal for external stakeholders and development partners
- 

## 15 — FAQ & Troubleshooting

---

### Q: I forgot my password. What do I do?

Click **Forgot Password** on the login page, enter your email, and follow the reset instructions sent to your inbox.

---

### Q: I can't see certain menu items in the sidebar.

Menu visibility depends on your **role and permissions**. Contact your administrator if you need access to additional modules.

---

### Q: I can't edit an action / programme / project.

Possible reasons:

- You have an **Observer** role (read-only)
- The entity belongs to a **sector** you are not assigned to
- The entity has been **validated** and is locked

Contact your administrator for assistance.

---

### Q: How do I change the language?

Use the **language selector** in the top header bar to switch between English and French at any time.

---

### Q: Why can't I modify the GHG Emissions for a specific year?

That year's inventory has been **finalized**. Finalized data cannot be changed to ensure integrity. Contact a Root user if corrections are necessary.

---

### Q: How do I export data?

Most pages have a **Download Excel** or **Export** button. Click it to download the current view (with any active filters) as an XLSX file.

---

### Q: Who can validate entities?

Root and Admin users can always validate. Government Users can validate only if granted the **Validate Permission** by an administrator.

---

### Q: How do I link a programme to an action?

When creating or editing a **Programme**, use the **Parent Action** field to select the Action it belongs to. The same pattern applies to Projects (linked to Programmes) and Activities (linked to Projects).

**Q: What file types can I upload?**

Supported formats: **PDF, DOC, DOCX, XLS, XLSX, PNG, JPG**, and other common file types.

**Q: The dashboard charts are empty.**

Charts display data from existing records. If no data has been entered yet, charts will appear empty. Start by creating climate actions and entering GHG data.

**Glossary**

| Abbreviation  | Full Name                                 | Definition                                            |
|---------------|-------------------------------------------|-------------------------------------------------------|
| <b>NDC</b>    | Nationally Determined Contributions       | A country's climate pledges under the Paris Agreement |
| <b>NAP</b>    | National Adaptation Plan                  | National strategy for climate adaptation              |
| <b>ETF</b>    | Enhanced Transparency Framework           | Reporting requirements under the Paris Agreement      |
| <b>CTF</b>    | Common Tabular Formats                    | Standardized UNFCCC report templates                  |
| <b>GHG</b>    | Greenhouse Gas                            | Gases that trap heat in the atmosphere                |
| <b>GWP</b>    | Global Warming Potential                  | Factor to convert GHGs to CO2 equivalents             |
| <b>IPCC</b>   | Intergovernmental Panel on Climate Change | UN body for assessing climate science                 |
| <b>MRV</b>    | Monitoring, Reporting, and Verification   | System for tracking climate commitments               |
| <b>tCO2e</b>  | Tonnes of CO2 equivalent                  | Standard unit for measuring GHG emissions             |
| <b>AFOLU</b>  | Agriculture, Forestry and Other Land Use  | IPCC emissions category                               |
| <b>IPPU</b>   | Industrial Processes and Product Use      | IPCC emissions category                               |
| <b>WM</b>     | With Measures                             | Projection scenario with current policies             |
| <b>WAM</b>    | With Additional Measures                  | Projection scenario with new policies                 |
| <b>WOM</b>    | Without Measures                          | Baseline projection scenario                          |
| <b>CBT</b>    | Climate Budget Transparency               | Budget tracking for climate actions                   |
| <b>UNFCCC</b> | UN Framework Convention on Climate Change | International climate treaty                          |

## Available Sectors

The platform supports **14 sectors** for classifying climate actions:

| # | Sector               | #  | Sector                 |
|---|----------------------|----|------------------------|
| 1 | Energy               | 8  | Coastal Resilience     |
| 2 | Transport            | 9  | Health                 |
| 3 | Industry (IPPU)      | 10 | Hazards Management     |
| 4 | Agriculture          | 11 | Nature Based Solutions |
| 5 | Forestry             | 12 | Blue Economy           |
| 6 | Water and Sanitation | 13 | Cross-cutting          |
| 7 | Land Use             | 14 | Other                  |

---

## Contact & Support

For technical support or questions about the platform, contact your **system administrator** or the **national climate change focal point**.

---

### National Climate Transparency Platform

Developed by **UNDP — Digital for Climate**

*This user manual covers all platform features as of Version 1.0. For the latest updates, refer to the FAQ section within the platform.*
